

Corti: building a visual identity that bridges healthcare and AI

Corti：建立連結醫療與 AI 的視覺識別

Designing a clear, trustworthy look for a complex, high-impact product.

為一個複雜且影響深遠的產品設計出清晰且值得信賴的外觀。

Project overview 專案概述

Team: Robert Vagin, Kira Tiemirshyna, Dima Lepokhin

團隊：Robert Vagin、Kira Tiemirshyna、Dima Lepokhin

Created at: heartbeat.ua 建立於：heartbeat.ua

What I worked on: 我的工作項目：

Brand Identity refresh 品牌識別更新

Corti, founded in 2016 in Copenhagen, Denmark, specializes in AI solutions for healthcare. It provides real-time decision support during patient consultations, helping healthcare professionals improve accuracy and efficiency.

Corti 於 2016 年在丹麥哥本哈根成立，專注於醫療保健領域的 AI 解決方案。它在病患諮詢期間提供即時決策支援，協助醫療專業人員提升準確度與效率。

Corti: AI for better healthcare

Corti : 以 AI 改善醫療照護

corti

The challenge: 挑戰：

Corti is an AI company helping medical professionals make faster and more accurate decisions during patient consultations. Their tech listens in, detects patterns, and supports healthcare teams in real time. Powerful? Yes. Easy to explain? Not always.

Corti 是一家 AI 公司，協助醫療專業人員在病患諮詢過程中更快速且更準確地做出決策。他們的技術會傾聽對話、偵測模式，並在即時支援醫療團隊。強大嗎？是的。容易解釋嗎？不一定。

So the challenge was: how do you translate something this complex into something human, trustworthy, and clear?

所以挑戰在於：如何把這麼複雜的事物轉化為對人友好、值得信賴且清晰易懂的內容？

The approach: 方法：

✿ Calm and modern visual identity:

冷靜且現代的視覺識別：

Smooth shapes, and gentle colors give Corti a smart but approachable look: always present, never loud.

流暢的形狀與柔和的色彩賦予 Corti 智慧而親切的外觀：總

是存在，從不喧囂。

✿ Visuals that breathe: 有呼吸感的視覺：

Organic forms and natural tones create a sense of space and focus. It's tech, but it feels human.

有機的造型與自然的色調營造出空間感與專注感。這是科技，但感覺有人性。

✿ Built as a system: 作為一個系統構建：

Modular blocks designed to work across web and product. Scalable, simple, and consistent.

為網頁與產品設計的模組化區塊。可擴充、簡潔且一致。

✿ Animating sound: 為聲音加入動畫效果：

We explored ways to visualize audio interactions: subtle pulses, waveforms, and feedback animations that reflect how Corti listens and responds in real time.

我們探索了多種視覺化音訊互動的方式：細微脈動、波形以及反映 Corti 即時傾聽與回應的回饋動畫。

Yearly Calls

+3 million

Call Takers

+800

"SOS Alarm is Sweden's nationwide emergency-service provider. They are responsible for more than three million calls annually across emergency, fire, and police divisions."

A rising population in Sweden, combined with more demand for telehealth and a worker shortage, have exacerbated an already-existing need to support call takers through better protocol guidance.

Good morning Mrs.Peterson. How are you feeling today?

Sally • 0:03

I'm feeling much better, thank you. Just eager to get home

Hannah • 0:05

That's great to hear. We've completed all your discharge paperwork. Before you go, I want to review some important information with you.

The image displays six spectrograms arranged in a 2x3 grid, each representing the same audio content: the sentence "Sally Peterson Speaking...". The spectrograms are color-coded and time-shifted to illustrate different aspects of the audio signal.

- Top Row:**
 - Dark Blue:** Shows the full frequency spectrum. The time offset is 00:11:22. A play button icon is in the bottom right.
 - Grey:** Shows the full frequency spectrum. The time offset is 00:11:22. A play button icon is in the bottom right.
 - Light Orange:** Shows the full frequency spectrum. The time offset is 00:11:22. A play button icon is in the bottom right.
- Bottom Row:**
 - Orange:** Shows the full frequency spectrum. The time offset is 00:11:32. A play button icon is in the bottom right.
 - Dark Blue:** Shows a zoomed-in view of the high-frequency components (vowels). The time offset is 00:11:32. A play button icon is in the bottom right.
 - Grey:** Shows a zoomed-in view of the high-frequency components (vowels). The time offset is 00:11:32. A play button icon is in the bottom right.

Each spectrogram includes the text "Sally Peterson Speaking..." at the top left and a play button icon at the bottom right. The time offsets are displayed at the bottom left of each spectrogram.
